# HAND STOP

Hand stops are mainly used temporarily, for inspection procedures. That is why they can only be operated with a handle. Our hand stops are made to measure from high-quality stainless steel for each order, and are tighter than the standard prescribes. They are also bidirectional in both flow directions.

## CHARACTERISTICS HAND STOP

# Sluice gate

Design

# 100 – 1200 mm

Width

# 0.15 – 1.20 m

Head of water

Frame design has a round bottom profile for setting in concrete or doweling.
